

The Tree of Life

and other Quilt Blocks
using the
Half-Square Triangle

The half-square triangle is considered one of the most popular building blocks in quilting. This versatile unit is used in many traditional quilt blocks as well as in modern quilt design. In this class you will learn techniques for making HSTs quickly and accurately, and then use these units to piece the Tree of Life quilt block. This simple yet striking block will be used to complete your project as a pillow, a wall hanging or as part of a larger quilt. Construction of other quilt blocks using the HST will also be explored.

Preregistration is required. To register call: 518-327-6241.
The Supply List is available upon registration.

Instructor: Karen LiVecchi

Saturday, March 22, 2014
